MISSION TO JUPITER PART TWO by jason welch

The whole party take a train across South America through Mexico arriving at French Guiana then take mini buses to the European Space Agency launch site. .
They drive over the launch pad with the AREAN 5 standing majestically in the centre and park up next to the visitors gallery, where crouds of spectators are arriving
STRINGFELLOW ARE YOU READY FOR A GIANT LEAP FOR MANKIND?
ANDREW STERLING It's either that or spending the rest of my days pining for the fields anonymous. It will put me up with the ranks of Armstrong and Aldrine .
A Green psychedelic VW Campervan drives over the launch pad and passed the rocket to pull up near the visitors gallery and sports commentator MIGHTY WHITE gets out followed by PROFESSOR TREVITHICK his daughter JENNY and VICE CHANCELLOR MARTIN EMERSON .
VICE CHANCELLOR MARTIN EMERSON Great Scott look at the size of that Space capsule.
ian bannan It's the maximum payloads allowed by the European Space Agency as I had to incorporate extra features from my main design .
JENNY That's right viewers the new design will allow for a thorough survey of the area once the BULK CRUISER VISCOUNT links up with it with a Jupiter shuttle This October ..
JENNY They revealed that high atmospheric conditions would create buffeting by **slipstreams** and they

might have to postpone.
IAN BANNAN tHEY'VE CHECKED AGAIN AND THE ATMOSPHERIC CONDITIONS ARE PERFECT AS LONG THE THE ROCKET DRIVES STRAIGHT UP INTO THE STRATOSPHERE .
MIGHTY WHITE Did you hear that sports fans The experts are saying it's going to be a successful launch.
TREVITHICK And by Jove what great day for the Space Program the atmosphere is electric.
ANDREW STERLING Expect to make it to Jupiter with the suspended animation unit that I've been testing for the last few months ..
STRINGFELLOW SHAW Only if you lick my belly button you'll make it to th RED EYE OF JUPITER in the SPACE CAPSULE.
JENNY It will take 3 months for the capsule to reach it's destination above the red eye of Jupiter .
ANDREW STERLING and I'll be in suspended animation for The Voyage .
TREVITHICK what a great day for the BRITISH ROCKET GROUP.
MIGHTY WHITE WHAT'S THAT PROFFESSOR.?
TREVITHICK they've got a new independence Space Program waiting in the Tartan Titan pothole in Derbyshire .
MIGHTY WHITE YES THE VISCOUNT.
STRINGFELLOW SHAW So after this great adventure we're back to the school for sixth form College.
MICHAEL SULLIVAN That's if the foundation doesn't find us something else .
ANN FITZGERALD Something to keep our fans around the world entertained . other work for us .
T MINUS 30 MINS
david manning SO IT SAYS IN YOUR WILL you leave everything to us .?
TIM CURRY[LEMON JUMPER CREAM SLACKS]who discovered you after a failed career as a disc jockey in

FELIXSTOWE .
ANDREW STERLING Oh yes i leave all my estate to the TRAFALGAR GANG,
MIGHTY WHITE technical director of CLICKNALOGIC industries will guide you.
IAN BANNAN Remember there's a magnetic lock AND PRESSURE GAUGE BY THE DOOR.
DAVID GARDNER And when you're told to simply get into your DRUTHGO UNIT and you will sleep for three months to awaken near the RED EYE OF JUPITER .
ANDREW STERLING Jupiter yeah I thought I'd start my mix with GROUND CONTROL TO MAJOR TOM arrangement with the European Space Agency management who timed it to coincide with the main boosters firing thrusting me high into the atmosphere .
LORA DENHAM COULD BE A WINNER.
ANDREW STERLING And I'll use the same when the solar sails fan out when I've achieved geostationary orbit above the RED EYE OF JUPITER .
IAN BANNAN I'll come up with you Andrew so you go through your last induction of the working of the capsule .
OLIVER MOSS ANN can you go with IAN and help ANDREW into his capsule .
They all walk over the the tarmac and into the steel rid erected next to the AREA 5 rocket ,then step into a lift that hoists them 50 feet up to the cockpit.
IAN BANNAN Andrew if you want to get into your flight suit I'll just go through the procedures again .
ANDREW STERLING Fire away while i get into my one piece cotton garment.
IAN BANNAN Before blast off get into your acceleration couch but keep an eye on the pressure gauge by the door.
ANN indicates the panel next to the door of the space capsule.
ANN FITZGERALD g FORSE WILL INCREASE AS THE ROCKET ACCELERATES AWAY.
ANDREW STERLING I've got CALLING OCCUPANTS

OF INTERPLANETARY CRAFT by the CARPENTERS .
IAN BANNAN The pressure in the cabin will increase and the pressure. outside the cabin will decrease and when g-forse and gravity is zero.
ANN FITZGERALD You'll see that the pressure on the outside is zero and the pressure on the inside is maximum.
IAN BANNAN Then you leave your acceleration couch and walk over to the suspended animation unit .
ANN FITZGERALD You then attach the wires and drip feeds to the to the places we've already indicated .
IAN BANNAN The unit will regress you so you're effectively hibernating throughout your voyage .
ANN FITZGERALD And if you just want to lick my belly button for luck you probably make it over the black void of space to a geostationary orbit above the RED EYE OF JUPITER .
ANDREW STERLING Just for the benefit of the thousands of associate Foundation members I'm looking forward to the entertainment ..
IAN BANNAN All your entertainment will be fed straight into your hypothalamus by the head unit connected to your visor once you're inserted
ANDREW STERLING As the JUPITER CAPSULE passes the moon I watch MOON ZERO TWO staring James Olson Catherine von shell and and BERNARD BRESLAW that's when I'm not listening to my my mix i created especially for this launch
IAN BANNAN GREAT.
ANDREW STERLING As the JUPITER CAPSULE passes MARS RAY BRADBURY MARCIAN CRONICALS STARING ROCK HUDSON.
IAN BANNAN GREAT.
ANDREW STERLING As the JUPITER CAPSULE gets close to it's destination I'm going to watch Stanley Kubrick's 2010 and and couple of episodes of UFO with ED BISHOP and GEORGE SEWELL .
IAN BANNAN Good luck Andrew 10 MINS to blast off so

we have to leave you now.
Andrew gets into his acceleration couch and IAN BANNAN shuts the door .He and ANN get into the steel lift and send it down the rigging next to the rocket .
They walk out onto the tarmac and from tannoy speaker they hear T-MINUS 2 MINS
IAN BANNAN Our timing out we gotta clear the blast area or we'll be deep fried .
They walk around the main boosters which have started omitting a low rumble .
IAN BANNAN We're gonna have to run all we're gonna be fried .by the main boosters .
They run over the tarmac just as the AREAN 5 rocket fires it boosters sending a wall of flame toward them and reach the visitors gallery just in time .
Music starts blaring compiled by ANDREW STERLING and all eyes are looking heaven ward when the rocket lifts off increasing speed to it reaches maximum acceleration . it zooms through a cloud blank .
MIGHTY WHITE Never in my long career sports presenter have i seen a spectacle like that before, and this launches sponsored by mighty white whole grain bread mixed grain , Robinson's strawberry jam and KORONA MARGARINE.
MIGHTY WHITE And now friends I'm gonna go to the mission control to talk to our brave foundation astronaut .
MIGHTY WHITE ,OLIVER MOSS , MATT HOUSTON and STRINGFELLOW walk away from the visitors gallery and over to a one story building and walk down through past ground control monitoring stations where there given a cubicle in an open plan office with a free standing microphone .
MOSS As soon as we get the green lights will be able to talk to our astronaut .
STRINGFELLOW And then from there we'll take a a flight back home and start from college.
LORA DENHAM There's a new purpose built building separate from the rest of the school offering vocational education .
MOSS Oh and you're audience appreciation figures are very high throughout the federation .
LORA DENHAM We're getting pleasing feedback from keen as mustard magazine. MOSS It's been really nice meeting you but me and MATT HOUSTON .have got to get to Guatemala .
STRINGFELLOW WHY'S THAT.

MATT HOUSTON For a couple of men called KEMP and FISHER who are waiting for some nitrous oxide which was taken from Dallas hospital .
MOSS One of there support anesthetists run run off with the laughing gas WHEN THERE ARE BREAST ENLARGEMENT OPERATIONS WAITING AT THE HOSPITAL.
MIGHTY WHITE That's right sports fans and I've got to cover the Kentucky Derby we're spitfire is racing so I'll be going with BUDDY IBSEN and WALT BASCOM to the racetrack for a special report of moss radio .
MATT HOUSTON And don't forget it's all done for charity.
FROM THE SPEAKER ABOVE THE WINDOW
ANDREW STERLING Hello Jupiter shuttle calling earth can you hear me.
MOSS How's it feels to be out in space .
ANDREW STERLING Well I'm floating around I kept my eye on the pressure gauge .
MOSS What are the pressure gauge readings ANDREW ?
ANDREW STERLING The pressure is up on the inside of the cabin and it's way down on the outside .
ANDREW STERLING From the small viewing ports I can see an aerial view of Europe and thea Mediterranean .
ANDREW STERLING I'm just going to go into my suspended animation before the capsule points it's nose towards Jupiter.
A synthesized voice comes over the tannoy main boost as firing.
ANDREW STERLING I'm going to crawl into this suspended animation tank and start the medication and drip feeds .you'll have a report for me as we reach the gas giants of Jupiter.
LORA DENHAM And you should wake up in three months time over the RED EYE OF JUPITER as you licked ANN'S belly button for luck ,
MIGHTY WHITE Don't worry son once I get back to the sound studio I'm gonna edit this into a podcast and every member of the foundations gonna listen to it.
MOSS THIS launch will soon reach our members around the world and you'll return to a hero's welcome .
